

Says

What have we heard them say?  
What can we imagine them saying?

A Comprehensive Collection Of Information on airports.

It is thus natural that airports and national airline companies are often times associated with the image a country or region.

Identify each city's global role based on inter and intracommunity connections.

Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

The structure of the air transportation network is mostly determined by the concurrent actions of airline companies.

The structure of the network is also the outcome of numerous historical "accidents" arising from geographical.

The worldwide air transportation network is responsible for the mobility of millions of people every day.

GLOBAL AIR TRANSPORTATION

Almost 700 Million Passengers fly each year.

We build a network of 3883 locals,villages,towns

Identify these communities by using algorithms recently developed for study

We focused our analysis on a network of cities

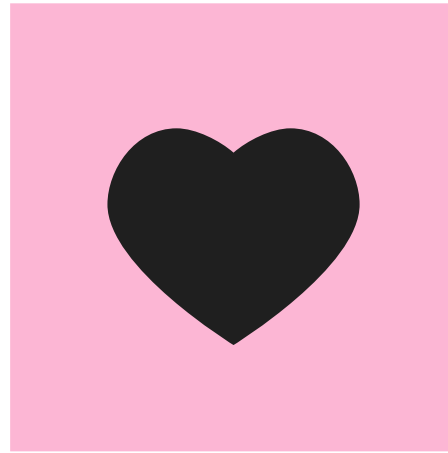

We further restricted our analysis to passenger flights operating in the time period

The fact that different networks seem to be formed by nodes with network

Does

What behavior have we observed?  
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
